ION INOILNUANCES

pure color - without ammonia

From research on renewable vegetable sources is born : INOILNUANCES, pure colors and defined, strictly no ammonia.

This new color, thanks to its exclusive formula made ??with micropigments essential oil, provides an extremely comfortable color in full compliance of 3 elements: the skin, the hair and the environment.

Napura, after years of tests and studies presents a new color technology, based on the exclusive blend of vegetable oils enriched precursors of color. Among the natural oils used, most important are those of the shoots of cereals such as rice and wheat, combined with the high-quality borage oil, very useful for the recognized protective functions and nutrients. To these are added oleic acid, a typical constituent of olive oil. The absorption in the structure of the hair is favored by micro pigments and mixture of vegetable oils provides protection and hydration to the skin.

The color provides maximum performance in coverage, durability and uniformity, expressing a great vocation in illuminating the capillary structure. The alkaline ammonia-free is absolutely comfortable environment for living. The ammonia fumes annoying, unpleasant not only for the hairdresser, are no longer a problem, it just so even the annoying itching skin.
