PASSION PROTECTION

protective treatment pre- technical processes

Emmediciotto The company has always been attentive to the needs of each individual, introduced PASSION PROTECTION for additional care of the skin prior to any heat treatment, especially after the summer, when the scalp is more sensitive. Emmediciotto hair care such as skin.

PASSION PROTECTION is a preserved pre- technical processes, based Guaiazulene acids and lyophilized fruit.

The extraordinary power of calming Guaiazulene acts in synergy with the buffering capacity of the modulated lyophilized fruit acids to effectively counteract the possibility of irritation and redness due to the alkalinity of hair dyes, permanent waving and bleaching agents : PASSION pROTECTION isolates the skin and protects it in an active way, without interfering with the technical treatment later.

method of use : a dry hair, apply a thin layer of cream on the whole skin, apply with a light massage. Then proceed with the technical service.

package : 250 ml bottle.
