SHINE SHAKER spray gloss effect

gives a greater feeling of smoothness, shine a more pronounced anti-frizz and better results compared to untreated hair. Thanks to Element Tech, Sebastian SHINE SHAKER proprietary formula strengthens and moisturizes the hair from within for a gloss base. Furthermore, the technology Air Tech uses a combination of three polymers, dispersed in the form of tiny droplets that create a light layer, homogeneous and uniform around the hair, gives great brilliance. The result is a smooth and homogeneous surface of the hair that makes possible an incredible reflection of light even when it is applied to the top of the TEXTURE MAKER as a spray to obtain a final effect of absolute gloss.

box: 75 ml vial.
