NATURALLY STRAIGHT SMOOTH INFUSION™

hair more smooth course

smoothing cream that thanks to the power plant, allows smooth progressive styling. A styling treatment that application after application, makes hair smooth in a progressive manner. The secret is in its natural formulation. Unlike chemical straightening treatments, Smooth Infusion™ Naturally Straight does not penetrate the hair shaft and will not affect the body's natural defenses, but it acts from the outside. A thin, invisible film composed of extracts of plant fibers will stick to the hair and keeps it smooth styling. A barrier of organic tapioca starch and corn helps protect the hair from humidity and reduce frizz. The fresh aroma and citrus Smooth Infusion™ Naturally Straight is an exclusive plant infusion of bergamot, palmarosa, Turkish rose and Australian sandalwood.

Application: depending on hair length and thickness, apply a small amount Smooth Infusion™ Naturally Straight damp hair starting from the nape of the neck and evenly distributed over all lengths. Dry the hair straight with the help of a brush. If you want, finalize the look with a plate. For very curly hair it is recommended to apply before Smooth Infusion™ Style Prep Smoother.
