K05 - FALL TREATMENT

K05 - trattamento anticaduta

K05 is designed for those who want to effectively combat the weakening of the hair of the scalp due to imbalances, stress or physiological declines typical in some periods of the year. For best results we recommend a synergistic use of the three products every three months.

The line consists of:

- SHAMPOO ANTI
- LOTION ANTI
- DROPS TARGETED ACTION

method of use : bump for action : Lotion shock treatment : two applications per week for 6/12 weeks; fall prevention shampoo : two washes per week for 6/12 weeks. For a localized intervention. Drops targeted action : an application to the day on critical points.
