INTERACTIVES : BALANCE SCALP INTERACTIVES: SCALP BALANCE

moisturizing treatment rebalances the scalp
Greasy hair are often dehydrated due to an imbalance between excess sebum and an ideal level of hydration.
The accumulation of fat affects the scalp causing congestion and irritation, and is aggravated in the case of too frequent washes that dehydrate the skin and hair. The Hydra Capture system regulates the water level inside the fiber and prevents dehydration caused by excessive washing. A peptide reduces the soothing sensation of itching and irritation on the scalp, giving relief and well-being.
Results: normalization of sebum production in less than a month *. The scalp recovers its natural balance and your hair stays clean longer and lighter.
* Clinical trials carried out on men and women with overactive sebaceous glands.

SEBUM BALANCE SHAMPOO - sebum
DERMAL CLEANSING CLAY - clay treatment
